

## PRODUCT OVERVIEW

# AMX ACENDO AND CT KIT COLLABORATION

## Comprehensive Technology for Huddle Spaces

HARMAN Professional is dedicated to providing technology that streamlines productivity with simplified meeting launches, room scheduling, document sharing, visiting device support, and the best AV distribution in the industry. Our meeting space technology minimizes the burden on staff by working as it's expected in order to support any level of technology user. In meetings, when technology interruptions occur, it's not only frustrating, it can alter meeting outcomes dramatically. That's why it's so important to choose products that work in harmony to support the human element of creativity.

**Reliable Host (in-room) Device with Wireless Content Sharing Capabilities.** AMX Acendo Core is an in-room collaboration device that supports on-screen room scheduling with simple meeting launches, access to content on the network, web browsing, and support for wireless sharing from a variety of platforms including Windows, Mac, iOS, Android and Chrome. Acendo Core is easy to install and easier to maintain than a room PC.

**Professional Audio & Video So Everyone Can Be Seen and Heard.** AMX Acendo Vibe is a premium conferencing soundbar with audio by JBL. It features a wide-angle camera that can capture anyone in the room and audio that's precision tuned for voice clarity, echo cancellation, and ambient noise reduction.

**Room Scheduling and Easy Meeting Launches.** While AMX Acendo Core provides scheduling capabilities and one touch meeting launches in the room, AMX Acendo Book is a beautiful, thin profile scheduling panel that mounts outside the room. It includes color-coded room availability indicator LEDs, a simple "scroll the schedule" interface that syncs with the scheduling platform and allows booking and room browsing directly from the panel.

**Accessible Physical Connections for Visiting Devices with Automatic Technology Actions.** AMX Connectivity and Transport (CT) Kits provide physical HDMI and VGA connections for visiting device hardware. When mounted under the table, and used with AMX HydraPort architectural connectivity, it's easy for visitors to connect when entering the room. Once connected, the CT Kit displays the most recent connected device, eliminating confusing user interactions.

**Resolution Support and Video Scaling.** AMX CT Kits provide resolution support for HDMI devices up to 4K, as well as video scaling for lower resolution VGA sources so you can ensure optimal viewing experiences and eliminate video drops due to incompatible resolution between source and display.

## Huddle Space with AMX Acendo Core, Vibe, Book and CT Kits

- Acendo Core acts as the host device and shares content from visiting devices, using built-in AirPlay, Miracast, and Google Cast
- View up to four sources of content onscreen simultaneously
- Room scheduling, onscreen web conference meeting launch, web browsing, access to network drives
- Acendo Vibe provides wide-angle camera and premium JBL sound for web conferencing
- CTC Transmitter supports multiple visiting devices with HDMI, DisplayPort, VGA, and USB-C
- CTC Receiver connects to in-room host or PC
- Transmitter and receiver connect with a single category cable, up to 80m for 4K
- CTC Kit automatically switches to last connected guest, giving access to share AV content and access to USB peripherals, including keyboard, mouse, touch display, and soundbar
- CTC Kit reverts back to room host when guests are disconnected

### AMX Acendo Core Collaboration System

This meeting place collaboration system includes web conferencing, document viewing, and wireless screen sharing in an easy-to-use platform. In this application, Acendo Core provides an easy method for meeting attendees to begin a web conference, wirelessly share content from multiple devices at once, and view presentation materials using the built-in document viewers.

### Acendo Book Scheduling Panels

Acendo Book Scheduling Panels integrate directly with popular room scheduling software like Microsoft Exchange, Office 365, and Google Calendar without additional system hardware requirements. The user interface background color and built-in room availability bars change between red and green to show room availability so users can easily locate and book an available room directly from the panel and, if that room is currently booked, users can quickly locate the nearest available room or the next available time with ease.

### Acendo Vibe Conferencing Sound Bar with Camera

Acendo Vibe is a total conferencing sound bar solution designed specifically for the demands and elegance of the modern workspace. Robust JBL audio provides far-field microphone array, ambient noise reduction, echo cancellation and professional speakers to deliver exceptional conference audio. A wide-angle camera catches everyone in the space; while CEC display control, USB and Bluetooth connectivity ensure an optimized experience.
